Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicant's representative presents remarks pertaining the differences between the prior arts and the applicant's invention, specifically the fluid disclosed in Cheon is not disposed within the chamber. Followed the discussion, applicant has considered the possibility to add the limitations of "the pump being configured to circulate a cooling fluid within the chamber", "the pump is being completely external from the chamber" and "the electronic heat source attached on the first surface" into the claims to overcome the previous rejection. Upon submission of a proper amendment, a further and updated search will be conducted .
